

# MOOJOY POSHAN LOOP

CLOSING THE NUTRITION GAP

## The Challenge (Why CSR is Needed)

- Moojoy's milk procurement has grown 18%, yet anaemia among women in sourcing communities remains >50%.
- This reflects a disconnect between production growth and community wellbeing, risking long-term farmer sustainability and brand credibility.

## CSR Purpose

To deliver direct nutritional impact in Moojoy's producer communities by addressing anaemia through school-led, community-wide intervention, aligned with Moojoy's role as a nutrition provider.

## Governance (At Risk)

Moojoy Poshan Loop integrates iron-fortified Moojoy milk into government midday meal schemes in high-sourcing districts, creating a school → home → community nutrition cascade.

Schools act as the anchor, children as carriers of awareness, and households—especially women—as primary beneficiaries.

# DESIGN • BUDGET • MEASURABLE OUTCOMES

## Program Design (How It Works)

- Iron-fortified milk supplied to government schools in sourcing clusters
- Nutrition education for students
- Quarterly community nutrition sessions for parents (focus on women)
- Collaboration with local health workers for Hb monitoring

## Aligned SDGs:

SDG 2 (Zero Hunger)

SDG 3 (Good Health)

SDG 4 (Quality Education)

SDG 12 (Responsible Consumption)

Year 1: Pilot in 5 states (500 schools) → Scale across 7 states by Year 3

## Treasury & Timeline (3 Years)

**₹18 Cr total (~1.5% of net profits)**

- **40%** – Fortification & product adaptation
- **30%** – Cold-chain & last-mile logistics
- **20%** – Community nutrition & school engagement
- **10%** – Monitoring, Hb testing & impact audits

## Impact & SDG Alignment

- Reduction in anaemia among women & adolescent girls
- Improved haemoglobin levels in intervention clusters
- Reduced milk spoilage via institutional cold-chain usage
- Stronger farmer wellbeing & supply stability
