EDUCATION

•Motilal Nehru National Institute of Technology Allahabad

2024 – Present

B.Tech in Electronics and Communication Engineering

Third year

EXPERIENCE

•QTC – Quality Techno Certification

Jul 2025 – Aug 2025

Software Development Intern

Riyadh, Saudi Arabia

- Developed backend logic, internal automation tools, and workflow improvements for enterprise operations.
- Contributed to UI/UX enhancements and full-stack development using React.js, Node.js, and MongoDB.
- Improved internal documentation workflows and process efficiency.
- Gained practical exposure to Dockerized environments, CI/CD workflows, and software deployment practices.

PERSONAL PROJECTS

•PACE — Personalized Academic Planning & Execution Platform

2026

React 19, TypeScript, Vite, Supabase, PostgreSQL, Express.js, Gemini API, Zod

- Built a full-stack adaptive study planner using Gemini 3.6 Flash + Zod to parse unstructured syllabi and a deterministic scheduling engine for zero-hallucination daily plan generation.
- Developed a multi-constraint engine factoring difficulty weights, timetable commitments and repetition intervals.
- Implemented Supabase Row-Level Security across all tables and shipped a 13-test automated unit suite.

•AuraVideo AI — Video & Meeting Intelligence Platform

2026

Python 3.12, FastAPI, LangChain, ChromaDB, Mistral AI, Groq Whisper, SQLite

- Built a 5-stage async AI pipeline converting YouTube URLs or local files into structured summaries, action items, and a RAG-backed conversational interface with real-time Server-Sent Events progress streaming.
- Designed a grounded LangChain LCEL RAG engine with namespaced ChromaDB collections per analysis session.
- Engineered a concurrent FastAPI backend with SQLite WAL mode and Tenacity exponential backoff retries.

•VoltEdge Intelligence — Energy Risk & Macroeconomic Analytics Platform

2026

Python, Pandas, NumPy, Streamlit, Plotly, SQLite, SQL — SRCC National Finalist

- Built a macroeconomic analytics platform modelling the impact of Strait of Hormuz disruptions on India's GDP, inflation, and exchange-rate risks through interactive scenario simulation and KPI monitoring dashboards.
- Developed dynamic macro-risk scoring workflows with data-driven policy intelligence modules.
- Designed energy diversification and resilience modelling pipelines using structured SQLite data architecture.

TECHNICAL SKILLS AND INTERESTS

Languages: Python, TypeScript, JavaScript, SQL, C, C++

Developer Tools: Git, GitHub, Docker, VS Code, Jupyter Notebook, Linux

Frameworks & Libraries: React 19, FastAPI, Node.js, Express.js, LangChain (LCEL), Streamlit, REST APIs, Zod

Cloud/Databases: PostgreSQL, Supabase (RLS, GoTrue Auth), SQLite (WAL), MongoDB, ChromaDB, Vercel

AI/ML & Analytics: Pandas, NumPy, Scikit-learn, LangChain, ChromaDB, Groq Whisper API, Mistral AI, Google Gemini API, Sentence Transformers, Retrieval-Augmented Generation (RAG), TextBlob, Plotly, Power BI,

Matplotlib, Forecasting, KPI Engineering, Dashboarding

Coursework: Data Structures and Algorithms, Object Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Probability and Statistics

Areas of Interest: Artificial Intelligence, Retrieval-Augmented Generation (RAG), Full-Stack Development, Data Science & Business Intelligence, Machine Learning, Software Engineering

POSITIONS OF RESPONSIBILITY

•Team LeadNational-Level Analytics, Consulting and Innovation Competitions

2025 – Present

ACHIEVEMENTS

•5+ Podium FinishesNational-level strategy, analytics, consulting and innovation competitions

•10+ National Finalist/Shortlist RecognitionsCompetitions hosted by IITs, IIMs, IISc, NMIMS, SRCC, MNNIT
